

# Galaxy Dimension integration module

THE GALAXY DIMENSION INTEGRATION MODULE ALLOWS SHARING INFORMATION ABOUT INCIDENTS AND ALARMS BETWEEN HONEYWELL GALAXY DIMENSION HARDWARE AND THE INTELLECT PSIM, ENABLING CREATION OF AXXONSOFT-POWERED SECURITY SYSTEMS THAT CONSOLIDATE DIVERSE HARDWARE IN A SINGLE SOFTWARE INTERFACE.

Galaxy Dimension represents a new generation of control panels suited for security, fire protection, and access control needs. These control panels can be easily integrated into complex site security systems.

## The Galaxy Dimension integration module supports:

- Monitoring Galaxy Dimension systems
- Managing Galaxy Dimension systems
- Setting users, access levels, and recording schedules

## The following Honeywell Galaxy devices are supported by the module:

- Galaxy Dimension GD-48
- Galaxy Dimension GD-96
- Galaxy Dimension GD-264
- Galaxy Dimension GD-520

## Here are just some of functionalities integrated:

- Intrusion alarms and events, such as Access Granted, Access Denied, Door Forced Open, etc.
- Arming and disarming selected intrusion detection zones

## The Intellect integration with the Galaxy Dimension control panel functions offers enhanced and effective alarm response scenarios:

- Send a PTZ camera to a specific preset or camera tour
- View live and recorded video from one or several cameras attached to intrusion detection zones
- Start Alarm Recording on any camera, etc.
